THE PUBLIC SERVICE COMMISSION OF
SOUTH CAROLINA
DOCKET NO. 2008-196-E- ORDER NO.2008-....
JANUARY....., 2009

INRE:

Combined Application of South Carolina
Electric & Gas Company for a Certificate of
Environmental Compatibility and Public
Convenience and Necessity and for a Base
Load Review Order for the Construction and
Operation of a Nuclear Facility in
Jenkinsville, South Carolina.

ORDER ON
INTERVENOR'S MOTION TO CHANGE
THE LOCATION OF TWO NEW
REACTORS PLANNED BY APPLICANT

This matter comes before the Public Service Commission of South Carolina ("Commission") on
proposed **Motion to Change the Location of Two New Reactors Planned by Applicant** filed by
Intervenor, Joseph Wojcicki. Supported calculations show a solution – the alternative location
for two AP 1000 reactors that should save on transmission line construction and project
operation costs, as well as completely remove from the Application the necessity to use South
Carolina water resources for reactor cooling systems.

The matter of a multi-million dollar bundle of avoided costs in electricity and saving water for
other users in the Southeast drought zone is in the public convenience and necessity which is in
the scope of Commission review and decision according to

.....
We cannot knowingly reject any possible location of the future nuclear plant(s) that avoid the
evaporation of an enormous volume of water that is a natural treasure of the State of South
Carolina. The reason of the order is also to avoid a criminal liability of Applicant's corporate
managers and project leaders (e.g. a *negligent supervision*)
.....

1. SCE&G (“Applicant”) must select a new location of the new AP 1000 reactors with ability to generate electric energy in the proximity to planned large load in the perspective of 2024.
 2. The Applicant must redo their Environmental Report (ER) to a new location, add network topography map and new diagrams of the transmission grid in their South Carolina region.
 3. The Applicant must also recalculate their cost estimation, especially in the transmission power systems.
 4. Office of Regulation Staff (“ORS”) must critically review the new Application focusing on SC people and government interests and present USA economy situation and new president Obama recovery plans.
 5. All the errors indicated in the time of hearing, cross-examinations and obvious mistakes in the present version of the Application and testimonies must be corrected to produce professional documentation set especially in the technical aspects.
 6. Professional form is required for all SCE&G publications including tariffs’ printouts. SCE&G must reorganize their public relations department so it will be efficient..... All actions to improvement in this public service activity must be a part of the quarterly reports with presentation of the project development.
 7. SCE&G will deliver the new version of the Application to be again reviewed by PSC. It is necessary to start this first in the world AP 1000 project well from the beginning and avoid any possible criminal negligence.
-

48 This Order shall remain in full force and effect until further order of the Commission.
